

# Dyslexia Hub

*Educating the Educators in FE/HE & Post-16*

## Issue

**DID YOU KNOW** that approximately 10% of the population worldwide have Dyslexia, and about 45% of Dyslexic students are diagnosed at university, often not until their final year?

**AND** Dyslexic and Neurodiverse students often do not get the recognition and support they need in Higher Education, Further Education and Post-16.

**ALSO** many believe they are not 'good' enough to attend university or Further Education because difficult experiences may have lowered self-belief.

**SO** their academic journey can be painful **BUT** raising awareness and support of learning differences in their educators could transform this.

**THROUGH** our experience and research we have developed effective study strategies that can successfully support all students, creating an inclusive learning environment.

**OUR AIM** is to share this knowledge and produce online and in person courses and training to educate the educators in FE/HE and Post-16 .

## Project

## Goals

**Successfully support students**

**Higher education accessible for all**

**Increased grades & engagement**

**Neurodiversity & academic success**

**Enhanced self-esteem & confidence**

**WE NEED YOUR HELP** to raise 100k to continue our research and produce online and in person courses and training to educate the educators and help Dyslexic and Neurodiverse students to SHINE.
